

Get Involved in a Regional Automated Vehicle Trial

What are we doing?

Transport for NSW is seeking industry and local partners to bring automated vehicle trials to Regional NSW.

We want to understand how connected and automated vehicles can improve transport across our state – and we need your help to develop and deliver NSW’s next automated vehicle trials.

Regional NSW provides some great opportunities to test the technology and we’re looking to provide seed funding and enable a number of trials from the second half of 2018.

How do you get involved?

We are looking for local councils, transport operators, universities and businesses to get involved and partner with leading technology providers and researchers to develop projects that address real transport issues in Regional NSW.

Come to one of our Collaboration Events to find out more and meet potential partners you can collaborate with to develop trial proposals. Click on the locations below to register.

- [Armidale](#) Thursday 1 February
- [Coffs Harbour](#) Friday 2 February
- [Wagga Wagga](#) Monday 5 February
- [Dubbo](#) Friday 9 February

Log in to our [Online Collaboration Portal](#) to share your contact details and find other participants to enable end-to-end projects to be developed.

Register through the [NSW e-tender website](#) to keep updated with the latest information about the Regional Automated Vehicle Trials RFEOI.
